Headteacher Mrs Roberta Harrison

Dear Parent/Carer

September 2025

Sparx

As a Maths department, we are continuing the use of “Sparx Maths” this academic year. Sparx Maths is an adaptive resource, which alters the student’s working levels based on their previous responses to questions. For example, if a student is finding their work too difficult, this would be recognised through incorrect answers or a longer than average time taken to answer the question and the system will automatically reduce the difficulty level or number of questions given in each extended learning. Consequently, each piece of extended learning will be tailored to the individual student. Please note it will take multiple uses before the system gleans sufficient information to accurately assess the appropriate level for students.

Sparx Maths will be used in years 7-10 for extended learning. All year groups including Year 11 will be able to use Sparx Maths for independent learning.

Students will be introduced to the system in their Maths lessons and extended learning will be set from Wednesday 10th September (5th November for Year 7 only). If students get extended learning on Sparx it will be set on Wednesday and students will have one week to complete this. As extended learning is adaptive to the student’s individual needs, students should aim to complete 100% of their extended learning. Students will receive 10 minutes of extended learning per lesson each week. For example, if your child is in Year 7/8/9, they have four maths lessons a week so will have 40 minutes extended learning set each week. Year 10 have 9 lessons across 2 weeks, therefore averages at 45 minutes per week. Sparx Maths is a system that tailors extended learning to your child’s specific level therefore it is important to avoid over supporting students in their extended learning. Once they have attempted the question and answered it several times incorrectly, the system will say, “seek help,” this is where students can receive support without a correct answer impacting the student’s algorithm. Please find enclosed a guide on accessing Sparx.

In addition to this, the Academy has also produced a document that links the course for every year group to relevant clips on Sparx such to facilitate revision for assessments or if a child is not at school.

The link below takes you to Mathematics page on our website where you can find these:
<https://www.harris.covmat.org/mathematics/> (Scroll to the bottom).

The provision of these links will also enable students to review work from previous years and this will be particularly useful to Year 11 for revision.

Sparx Maths is accessible on both mobile phones and chromebooks. For students who do not have access to the internet at home, or cannot access a device to complete the extended learning on, the maths department will be running a Sparx club every Monday in M03 with chromebooks available. Students can also ask the librarian to use the computers any break or lunchtime if they do not need any support from a Maths teacher. Additionally, I&A run an extended learning club after school every day with access to computers.
