

Background

I was born in a small town in the countryside of Sao Paulo, Brazil.

I moved to the UK while undertaking a post-graduation in finance and working for a consulting company.

I have a bachelor's degree in International Trade, a post studies in Finance and completed an MBA at the Warwick Business School.

Career Highlights

I have a few good memories from my time in J&J being involved in the launch of the Harry Potter line and working with skin care products. Completing my MBA in a second language whilst raising two young kids was also a massive achievement for me! In SE I enjoyed my trip to China and Dubai where I met new colleagues and was exposed to different cultures. I am happy to have made so many friends; it shapes my perspective every day.

Career History

During my last year of university, I entered the graduate scheme in Supply Chain in Johnson & Johnson Brazil. I also worked in the dynamic supply chain of fresh products and a few years in consultancy. I started my time in Siemens Energy eight years ago and progressed in the supply operations team. I had the opportunity to participate in some amazing projects and created good relationships with colleagues across different regions of the globe.

Family Life

I have been married for 17 years and we have two daughters (16 and 14) and a little Mal-Shi dog, called Max, who takes us out on rainy days. We like travelling to see our families and visit different countries. One of my favourite places is the Baha'i gardens in Haifa, Israel. In my spare time, I volunteer in working with children and young adults as this brings me great joy.
